SPECIAL MUSIC AN ATTRACTIVE FEATURE.			DR. MCCRORY'S LECTURES ARE UNEXCELLED.	

Commencement at Stanton College.

The students, friends and faculty of Stanton College are anticipating a very pleasant commencement season this year. The week beginning with May 12 will have several pleasant features in store for the people of Stanton and the surrounding communities. Beginning with the Baccalaureate sermon on Sabbath and ending with the splendid lecture on Thursday evening, there will be something interesting every day. Two features of the program deserve special attention, i. e., the lecture by Dr. McCrory and the Gold Medal Contest. Those who attended the contest last year will need no further introduction to this feature. In addition to this, another most pleasant evening is promised us on Thursday when Dr. J. T. McCrory, of Pittsburg, Pa., well known in the East as a most interesting speaker will deliver a popular lecture. These are two features, but there are others which are not to be omitted. Needless to say, the whole round of the week's attractions centers about the commencement proper on Wednesday evening, which with its graduation oration, special music, and special commencement address by Dr. McCrory, will furnish an evening of great enjoyment.

Then, too, the primary cantata on Monday, the music recital on Tuesday, and the ball game on Wednesday, will, with pleasant weather, combine to give Stanton College one of the most successful commencements in its history. Her friends and sympathizers are all invited to come and enjoy it with the students and faculty.

Willard Richardson paid the death penalty in the Eddyville penitentiary Friday for the murder of John Violet in Carlisle last February. Richardson said whiskey led him to his ruin. That's the trouble with nine out of every ten who come to such an end. Then, boys, beware of the first drink; if you have taken the first, then we say, beware of the next drink.

Responding to the call of the Comptroller of the Currency, the Clay City National Bank has another one of their splendid reports in this issue. It furnishes very satisfactory reading for all interested.

The Fayette National Bank of Lexington, will erect a building in that city twelve or fifteen stories high. The bank will occupy the lower floor while the upper stories will be rented for offices.

Death of J. H. Burgher.

Mr. J. H. Burgher died in this city Monday after a lingering illness of several months. Burial Tuesday afternoon in the local cemetery after the funeral services at the home be the Rev. J. C. Hanley. He is survived by wife and three small children, his mother, Mrs. Bettie Burgher, and three brothers, Mr. Albert M. and Asa Burgher, of this city and John W. Burgher, of Dayton, Ohio, who was ill in a hospital in that city and could not be present at the burial. Deceased was twenty-nine years old and was a noble gentleman of Christian character.

At all times, under all circumstances he endeavored to walk in the well beaten path of righteousness and when fully conscious that he was nearing the last of earth, he appeared to be fully impressed with the idea that at the end of time eternity began, and that the bright faith which sustained him during those trying hours of suffering would only grow brighter and brighter as he journeyed toward the Infinite, and the final gloom of death be dispelled by the radiance of God's love. Could all live the just and upright life J. H. Burgher lived, and die in his trusting faith, death could no longer be called "The King of Terrors" for he inspired no terror there. The dying man and sorrowing family looked forward with the same eye of faith to the brighter future where this temporary separation would end in an eternal reunion.

Don't Forget Your Cup.

The recently enacted State law prohibiting the common drinking cup in Kentucky will go into effect about May 10. The law forbids the use of common drinking cups on railroad trains and in railroad stations, hotels, boarding houses, restaurants, steamboats, stores, "or other publicly frequented places." No person or corporation in charge of such places shall permit the use of the drinking cup in common, and warning placards must be posted in conspicuous positions. A violation of the provisions of this act is punishable by a fine of not less than \$1 and not more than \$10, and each day's violation of any of the provisions of the act is to be considered a separate offense.

Sixty-three fourth class post offices have been designated by Postoffice General Hitchcock as saving depositories.

Mrs. Hubert Hunter, of Winchester, is visiting friends in the city.

What is Hydrophobia.

Owing to the prevalence of rabies in many dogs, all of which so far affected have been killed, and the loss of several head of stock in this vicinity, it is well that the public be educated along this line. A well-known authority on hydrophobia says it is inoculated to persons, rather animals, only by dogs, cats, wolves, foxes, and etc. It is caused only when the skin is broken; one-half the bites never take effect; but little danger where the bite is inflicted through the clothing, the virus on the teeth first being rubbed off on the clothing. There is positively no danger from hydrophobia to man or beast unless bitten by one of the species of animals mentioned above.

When dogs are seen to develop a morbid appetite, eating such articles as wood, straw, old rags, coal, and etc. it is a strong indication of rabies. Later, the dog solitude and is not playful and obeys his master with reluctance or not at all. He will be seen lying around sleepily, suddenly awakening and snapping at imaginary flies. In some cases dogs are melancholy, display no at-

tempt to bite at all and die from exhaustion in from five to ten days.

Hydrophobia in human beings not often takes effect until from three months to six months and in some cases not for years. A bite from a rabid dog heals as readily as a bite from one not so affected, but before the disease takes effect the old scar becomes inflamed and starts to running again. The disease is something fearful and too much precaution cannot be taken to prevent a single case, either in man or beast. It is far better to kill a thousand dogs not so affected than to take chances on one that has probably been exposed to rabid dog bites.

Lebanon will vote today on local option. The town has five times before voted dry and at the present time is in the dry column. As usual both sides are claiming the victory.

If the various State Boards of Health want to really put a check on consumption they should put a stopper first where it should be most effective. To do this we need a law to compel all the girls and ladies of our land at all times wear enough clothes to keep them warm, regardless of customs of styles. We frequently see young girls on the street with sleeves to their elbow, and but a very thin covering on up to their shoulders. This occurs on these cool Spring days when we have on our arms no less than three or four sleeves and at the same time feel none too warm. Many of these girls are then catching cold and aiding the consumptive germs to get a strong hold on their lungs and will later, in vet young womanhood, die with consumption. There should be a stop put to such foolishness for the benefit of the rising generation. If this remedy lay not in the power of the parent of the young ladies the state should enact a law along these lines and then see that it is enforced. Young ladies, if you think we are not telling you something for your own benefit, ask any competent physician and see if he doesn't say we are right.

On every hand there seems to be nothing but praise for officers of the Titanic because men were pushed back and not allowed to be saved with their wives. This all sounds good to read about unless you put a little study into the affair. Where can there be any bravery, common sense, or humanity in lowering lifeboats with empty seats while husbands are longing to occupy seats with their wives. According to all evidence before the Senate investigating committee not more than one of the life boats was anything like full. Three hundred more lives could have been saved and would have been saved had they have been allowed to be. This being true, we can find no words of praise for those in charge, but down right foolishness seems to us to have prevailed, or else they were all drunk as one sailor says they were.

The Colonel seems to be leading the field of Republicans in the race for the Presidency. It now seems that Taft should return thanks to Teddy for being privileged to sit in his White House these four years. All the people will have a chance for a say, so in November and Teddy, the terror will then receive the medicine he has been needing since he flung his hat in the ring. He will then wish he had first consulted his protege, Dr. Taft.

A Strong Candidate.

The Times is for John M. Stevenson, of Winchester, for Chairman of the State Central and Executive Committee of the Democratic party. We are for him because we know him to be a true man, a true Democrat, and a man worthy of this position or any other position he may be called to take care of. His being our neighbor is not the sole cause of our being for him, but is a matter of small consideration compared to his fitness for the place. He is a man that can lead the party this fall to the success we think it deserves.

Value of Temperance.

How often do you hear of women being into trouble of a serious nature? Women as a rule do not drink, nor are they allowed in saloons. Why not try the same precautions for our boys? There should also be no places allowed to exist or operate that are not fit for women to frequent. The boys are said to be worse than the girls, then they should not be allowed to go where girls are not permitted to frequent. Why should not our boys have the same care taken of them that we take of our girls? Parents take better care of your boys, is the warning of the Times.

Card of Thanks.

Through the columns of this paper we desire to return our warmest thanks to the citizens of this community for kindness and sympathy extended to us during the protracted sickness of our beloved J. H. Burgher. While our home now has a vacant chair, yet as we reflect upon the many deeds of sympathy and love of the citizens of our town, it gives a silver lining to the dark cloud left by death. We can only add "God bless the noble, big hearted citizens of this little city."

From 1865 to 1910 inclusive this nation paid out in pensions the huge sum of \$3,976,611,125.58 which went to 2,252,821 different persons, made up of soldiers in various wars, their widows and dependents. During one year, that of 1910, this same nation's drink bill was \$2,045,427,018. It is by such comparisons as these that one can get an accurate idea as to the enormous waste of the liquor traffic. The world has never grappled with any political issue that was so far reaching.

TWENTY YEARS.

Makes a great difference in most women. They are troubled with "nerves"—they suffer from backache, headache, sleeplessness, a sensation of irritability or twitching, hot flashes, dizzy spells, or many other symptoms of female weakness. The local disorder and inflammation should be treated with Dr. Pierce's Lotion Tablets and the irregularity and weakness of the female system corrected and strengthened with Dr. Pierce's Favorite Prescription. The strain upon the young woman or the woman of middle age—upon the nerve and blood forming structures—may be too great for her strength. This is the time to take this restorative tonic and strength-giving nerve and regulator. For over forty years sold by druggists for women's peculiar weaknesses and distressing ailments. The one remedy so perfect in composition and so good in curative effects as to warrant its makers in printing its every ingredient on its outside wrapper. The one remedy which absolutely contains neither alcohol nor injurious or habit-forming drugs.

Following letter selected at random from a large number of similar ones and cited merely to illustrate these remarks:
"In the winter of 1908, I became greatly run down and irregular," writes Mrs. HENRY SCOTT, of Swan Creek, Mich., Route 1, Box 48. "I slowly but surely grew worse, and, at last, resolved to apply to the doctors for help. The doctor said I had inflammation, enlargement and laceration. I was in bed eleven weeks and got no better. The doctor said I would have to have an operation, but to that I would not listen. My husband purchased two bottles of Dr. Pierce's Favorite Prescription. When I started to take this remedy I could not walk across the floor, but after I had taken three bottles I could feel myself gaining, so I dropped the doctor and took Dr. Pierce's Favorite Prescription. Only for it I think I would have been dead—I really believe it saved my life. I feel better now than in twenty years."

OUR WASHINGTON LETTER. (BY CLYDE H. TAVENNER.)

That the steel trust is willing to spend money to elect men to public office who are willing to serve it after they get into office, is again being demonstrated.

When Theodore Roosevelt was President of the United States he permitted the Steel Trust to absorb its principal rival, the Tennessee Coal and Iron Company. This permission to violate the law was worth millions of dollars to the steel trust, because it practically assured the trust a monopoly, leaving it free, by the simple process of tightening the screws on the public, to extort most any price it desired for its products.

The absorption of the Tennessee company by the steel trust was in direct violation of both the spirit and the letter of the law. No one denies this. Not even the attorneys for the steel trust contend now, or ever did contend, that the deal was legal.

This is not the only favor Theodore Roosevelt did for the steel trust, or the harvester trust, at the request of Geo. W. Perkins, then partner of J. Pierpont Morgan.

Roosevelt's commissioner of corporations investigated the harvester trust, found it illegal, but at the suggestion of Mr. Perkins, the report was not made public.

The most exhaustive search of the records of Congress during the years that Roosevelt was president fails to show the passage of a single measure that even in the most remote manner affected the monopoly or the huge dividends of the steel trust. Hundreds of such measures were introduced in both the House and the Senate while Mr. Roosevelt was president. Each and every one was chloroformed in committee, and Mr. Roosevelt never raised his voice in protest.

Mr. Roosevelt is now a candidate for office. Every politician in the land is aware that he is spending more money to obtain delegates than any candidate for the presidency has spent in the last quarter of a century. Where is this money coming from? Let us see:

Eton Huntington Hooker, treasurer of the Roosevelt League, has just filed with the Secretary of State of New York a list of contributors to the Roosevelt campaign fund. This sworn affidavit reveals that in the city of New York alone, Geo. W. Perkins, organizer of the harvester trust and director of the steel trust spent \$15,000. Frank A. Munsey, the largest individual holder of the steel trust common stock in the country, contributed \$15,000 more. Thirty thousand dollars of steel trust money spent in a city of one state alone, and there are 48 states in the Union! This sworn statement shows that in New York City \$59,126.75 was spent to get about 15,000 Roosevelt votes, or practically \$4 a vote.

Senator Stephenson spent only half as much per vote in Wisconsin, and it was declared that he thus debauched American standards, and should not be permitted to occupy a seat in the Senate!

The point of this article, however, is that the steel trust stands by its friends.

A fine example of how the

railroads of this country "put on the screws" is revealed by a study of the statement of earnings issued annually by the Delaware, Lackawanna and Western one of the anthracite coal carrying roads. The following figures show the charge per ton mile, of hauling anthracite coal and general merchandise, over a period of four years:

	1911	1910	1909	1908
Coal	0.83	0.83	0.86	0.86
Merchandise	0.67	0.69	0.70	0.70

These figures show that the railroad gets more for hauling coal than it does for hauling merchandise, and it is ridiculous to suppose that it costs the railroad any more to haul a ton of one kind of material than it does another. A ton is a ton after it is once loaded onto a freight car.

The only explanation for the higher coal charge is that all competition has been suppressed in the coal carrying trade, whereas the roads are still forced to fight each other for their merchandise patronage. Coal is charged "all the traffic will bear," and it will bear a great deal because the railroads control the coal fields and the transportation, and fix the tidewater price by agreement among themselves.

The Carlisle Mercury advises people to ride about all they can this summer while the roads are good, and prepare to stay at home next winter.

Bad Spells

"I suffered, during girlhood, from womanly weakness," writes Mrs. Mollie Navy, of Walnut, N. C. "At last, I was almost bed-ridden, and had to give up. We had three doctors. All the time, I was getting worse. I had bad spells, that lasted from 7 to 28 days. In one week, after I gave Cardui a trial, I could eat, sleep, and joke, as well as anybody. In 8 weeks, I was well. I had been an invalid for 5 weary years! Cardui relieved me, when everything else failed."

TAKE CARDUI The Woman's Tonic

If you are weak and ailing, think what it would mean, to you, to recover as quickly as Mrs. Navy did. For more than 50 years, this purely vegetable, tonic remedy, for women, has been used by thousands of weak and ailing sufferers. They found it of real value in relieving their aches and pains. Why suffer longer? A remedy that has relieved and helped so many, is ready, at the nearest drug store, for use, at once, by you. Try it, today.
